The Government of Canada and the Government of the Northwest Territories have signed an agreement which will have far reaching effects on the economy of the Northwest Territories. Known as the Economic Development Agreement (EDA), it will provide $21 million for a co-operative and co-ordinated approach to the development of the human, natural and business resources of the Northwest Territories. The agreement will expire on 31 March 1987.

The Economic Development Agreement provides for three sub-agreements which identify development programs and the funding available. These sub-agreements are:

Human Resource Development	— $ 5.57 million
Natural Resource Development	— 4.68 million
Domestic Market Development	— 10.75 million
	$21.00 million

The main aims of the Economic Development Agreement are:

- To sharpen the business skills of northerners so they can participate more fully in their economy.
- To support
  - business growth and tourism development
  - community economic planning
  - development of northern markets for northern goods
- To identify potential opportunities that exist in available renewable and non-renewable resources
- To provide people in the Northwest Territories with the option of improving traditional economic activities and participating in wage employment opportunities

How EDA Works

The Economic Development Agreement starts and ends with the people of the Northwest Territories. Residents can take advantage of the programs under the sub-agreements.

- ■ DOMESTIC MARKETS
- □ NATURAL RESOURCES
- □ HUMAN RESOURCES

The EDA process involves a number of steps. This chart briefly explains these steps.

1. An individual, business, organization or association is interested in applying for funding for a specific project.
2. A review of the three sub-agreements will direct the person to the specific program which addresses his/her area of interest.
3. A person wishing to apply can seek further assistance and application forms from an EDA community contact person who is familiar with the programs.
4. A completed application is submitted to the Secretariat or Canada Employment and Immigration Commission for evaluation and recommendation.
5. Recommended applications are submitted to a management committee for approval.
6. Once approved, an agreement is signed with the implementing agency who will administer the funding. The implementing agency will be a department of the federal or territorial government responsible for the specific area under which the project falls.
7. The project gets under way.

Direction, co-ordination and delivery of the programs is the joint responsiblity of the Government of Canada and the Government of the Northwest Territories.

A secretariat located in Yellowknife will administer the Natural Resource Development and Domestic Market Develoment sub-agreements. The Human Resource Development sub-agreement will be administered by the Canada Employment and Immigration offices in Yellowknife. A management group for each of the sub-agreements will make the final decision on requests for funding.

Funding available under each program will be administered by the federal or territorial government departments which are responsible for the particular area involved in a project application. For example a tourism project could come under the responsibility of the territorial department of economic development and tourism.

Ninety percent of funding for all sub-agreements is provided by the Government of Canada with ten percent coming from the Government of the Northwest Territories. These sub-agreements will provide funding for approved projects.

Human Resources Development Sub-Agreement

The programs in this agreement will assist northerners to develop the skills required to expand their employment options and to participate in community-based economic development. The programs will also assist northerners to take advantage of business opportunities related to major resource developments.

This sub-agreement provides funding for two major programs, allocated as follows:

Business Management Development	— $2.275 million
Options North	— $3.295 million
	$5.570 million

Under this sub-agreement, applications for assistance will be analyzed by the Canada Employment and Immigration Commission and submitted to the sub-agreement's management group for a decision. Upon approval, the applicant will enter into a Contribution Agreement with the Canada Employment and Immigration Commission.

The programs under this agreement are briefly outlined on the following pages. Potential applicants are advised to seek more detailed information from an EDA community contact person, or from the Canada Employment Centre or Outreach office in the community.

BUSINESS MANAGEMENT DEVELOPMENT PROGRAM

This program will provide funds to improve the management capabilities of northern businesses and to make opportunities available for northerners to be employed as business managers.

By upgrading the managerial skills of northerners, the program will help break the traditional pattern of importing management skills from southern Canada. It will also lower the turnover rate of staff at the management level. By ensuring that trained management personnel are locally available, the program should overcome negative social and economic effects in communities caused by the move of existing local management personnel to resource based industries.

Specifically, to ensure that northerners participate fully in employment and business opportunities, funding will be made available in three areas:

- Evaluation/review of a range of potential options which would improve the management skills of northerners. For example, this program could evaluate the specific management needs of the tourism industry or the retail sector, and relate the findings of this evaluation to a review of the current deficiencies in the northern labour force.
- Consulting services to assist in the preparation of specialized teaching materials or support programs which relate directly to the requirements of an individual firm or an entire industry.
- Implementation programs which would employ a consultant or trainer to assist in the actual development of managerial skills within an organization.

Individuals, groups or associations of employers (i.e., tourism industry, co-op) and local development corporations are eligible for funding provided they are prepared to develop projects which will ultimately produce qualified northern business managers.

Trading in country foods and carving materials represents a source of cash income for northerners who prefer the traditional lifestyle of living off the land. It also assists in bridging the gap between traditional and wage economies.

Resources are unevenly distributed and trade at the intersettlement level could change this. Some communities have resources, some don't. For those who have, selling or exchanging surpluses could add to the local economy. For those that don't have the required country foods, obtaining them could add to the nutrition levels of their diets, and could maintain cultural ties.

Some communities are now expanding new methods of processing, packaging and marketing food products. Although intersettlement trade by reason of product supply and distance from markets will remain a small-scale commercial development, it can be marginally viable and can realize other social and cultural benefits.

This program will provide support for planning and developing intersettlement trade not only in country foods and soapstone, but in other crafts materials such as hides, antlers, whale bone and walrus ivory as well.

Within this program, there are four sub-programs:

Opportunity Identification Program
Funds will be available to determine which communities are willing to support and participate in intersettlement trade. Projects will identify and assess both the communities that want to offer products for trade, and communities that wish to receive these products.

Up to 100 percent of approved costs would be eligible for support. Community and regional groups, individuals, businesses and companies registered in the Northwest Territories are eligible for funding under this program.

Feasibility Studies Program
The main aim of this program is to determine if certain resources can be harvested profitably. It would also include an inventory of these particular resources.

For feasibility studies, up to 100 percent of cost may be funded.

Communities and regional groups, individuals, businesses and companies registered in the Northwest Territories may apply.

Forest Resource Development Program
The aim of this program is to stimulate the expansion of resource export activity and encourage the commercial use of N.W.T. forest products within the Territories.

Financial support will be for funding feasibility studies to determine the impact or viability of forest resource development and the implementation of commercial developments in the forest resource industry.

Individuals, businesses and corporations registered in the N.W.T., and the Governments of Canada and the Northwest Territories in response to initiatives from the other proponents are eligible for this funding.

Up to 100 percent of the costs required for data collection or feasibility studies, and up to 75 percent of costs for implementation of commercial developments can be covered under this program.

Northern Agriculture Development Program
This program is designed to stimulate, develop and encourage commercial use of renewable resources within the Northwest Territories.

Financial support may be made available for feasibility studies to determine the viability of agricultural projects such as husbandry of indigenous species, market gardening and greenhouses. This support will cover up to 100 percent of approved studies.

Individuals, communities and regional groups, businesses and corporations registered in the Northwest Territories and the Governments of Canada and the Northwest Territories in response to initiatives from the other proponents are eligible to participate.

Funding will also be available for the implementation of pilot projects related to the above areas. Up to 75 percent of the approved cost for implementing pilot projects can be covered under this program.

Small Business Intern Program
This program will assist small businesses to hire skilled personnel for newly created positions that may improve the management of the firm. The program should improve the productivity and efficiency of the smaller firms, decrease the number of business failures, and ultimately increase employment in the small business sector.

Small business enterprises (under $2 million annual sales) and community and regional development organizations are eligible to apply. Assistance will make up 50 percent of a managerial candidate's salary for a twelve month period, up to a maximum of $15,000 or $1,250 per month.

This program will not apply to a position already established. It is intended to create new, full-time, permanent managerial positions in small firms.

PROGRAM II — TOURISM DEVELOPMENT

This program encourages a well-planned and orderly expansion of the tourism sector of the economy. It will encourage a better distribution of tourism's economic benefits to all parts of the Northwest Territories, especially to communities and their businesses.

It is expected that community-based tourism will directly result in increased local and regional jobs and business opportunities associated with such things as food and accommodation services, equipment and clothing rental, souvenirs and handicrafts, guiding services and transportation services.

To cover the various needs of the tourism industry, the program is divided into six parts. They are:

- Regional tourism planning
- Tourism hospitality / awareness program
- Tourism associations' support
- Tourism superstructure program
- Travel generators expansion program
- Tourism marketing support program

Assistance will be in the form of a direct contribution to the owner/operator for up to 60 percent of the eligible capital costs identified for each type of project...upgrading/modernization... expansion...establishment. A minimum of $1,000 and a maximum of $50,000 will be available. Priority will be given to applications for projects from areas where a tourism study has been undertaken and which has indicated potential for tourism development.

Travel Generators Expansion Program
This program will support attractions or events which lure visitors to a particular area, thus increasing the tourism potential of that area. Assistance will be available to improve, expand or start an attraction or event which will appeal to the travelling/vacationing public.

Private sector entrepreneurs, non-profit organizations or travel associations currently operating events or attractions, or planning to establish them, will be eligible to apply under this program.

Assistance will cover up to 60 percent of eligible capital costs of this project. Priority will be given to areas where a tourism study has been undertaken and has shown potential.

Applications must be for a minimum of $1,000 for capital costs and a maximum of $50,000.

Tourism Marketing Programs
Product Destination Campaign
This campaign will provide funds to zone travel associations to stimulate interest for Northwest Territories package tours among southern wholesalers/agents.

It will cover the develcpment of travel trade brochures for distribution to selected package tour wholesalers/operators/retail agents and the cost of participation in travel trade seminars and trade shows. It will provide contributions for cost sharing of advertisements of a Northwest Territories destination with tour wholesalers/operators/airlines. It will also help defray the costs of bringing tour operators to the region to finalize their package tour offerings.
